

**AUTOMATED DEVICE FOR STANDARDIZED  
CELL THAWING**

**NEW**

... there is a better way than warming  
the frozen vial in hands.

- ❖ Every time the same thawing conditions enable standardization within cell cryopreservation workflow
- ❖ Detailed operation log files are recorded to ensure traceability (including temperature trends of the block and the surface of the vial)
- ❖ Consistent temperature control for the highest safety of your sample
- ❖ Automatic cooling preserves the sample after finishing of thawing
- ❖ Convenient acoustic alarm
- ❖ Integrated barcode and QR code reader for easy sample identification
- ❖ Memory for up to 4 thawing programs
- ❖ 2 operation modes: stand-alone device or PC-operated (up to 6 units/PC)
- ❖ Intended for cryogenic vials 1-6mL (H 92mm x D 25 mm)
- ❖ Temperature range 5-50 °C,  
typical thawing time (-80°C to 0°C) ca 3-4 min
