

VIAL TRAY

A space saving, durable and easy to clean transporter

Vial Tray

The MedSchenker® 100-hole, stand position, vial tray is made of 100% polypropylene making it virtually shatterproof, resistant to most solvents, easy to clean and autoclavable at 121°C for 20 minutes.

Engineered with you in mind, the low profile of the 219x182x20mm rectangle shaped tray can be stacked, when not filled, saving valuable space and the side cut-outs make transport easy. Each of the 15.6x20mm wells has an opening in the bottom to facilitate drainage and are positioned in a staggered formation to increase the ease in which vials are removed.

It isn't hard to see why more and more laboratories and medical institutions around the world have been outfitting their facilities with the MedSchenker® 100-hole vial tray.

Vial Tray (STM-TRAY)

Package	100 units per master package
Material	Polypropylene
Positions	100
Dimensions	219x182x20mm (Vial Tray) 15.6x20mm (Wells)
Autoclavable	121°C for 20 minutes
Stackable	When not filled

ADVANTAGES

- ❄️ Made of 100% polypropylene
- ❄️ Holds 100 vials
- ❄️ Wells are positioned in a staggered formation to increase the ease in which vials are removed
- ❄️ Trays have a low profile which helps save space
- ❄️ Wells have an opening in the bottom to facilitate drainage
- ❄️ Square shaped tray has side cut-outs to make transport easy
- ❄️ Trays can be stacked, when not filled
