

# SelectNA™ *plus*

Automated Isolation of Microbial DNA from  
Clinical Samples

## Key features

- One step pathogen enrichment and DNA extraction  
- MoLYsis™ technology
- Innovative walk-away system
- Whole blood and other sterile body fluids and tissues
- Flexible: 1 to 12 samples
- Contained: internal UV decontamination
- Minimizes DNA contamination

SelectNA™ *plus* enables superior performance of  
molecular assays for pathogens.
